

VOLENTIX

CAPABILITY STATEMENT

Dry hire, reimagined.

WHO IS VOLENTIX?

Dry hire, reimagined.

Volentix is a specialist dry hire and smart asset management (SAM) company, purpose-built to support Australia's mining, quarrying, civil and construction sectors with application-fit, low-age earthmoving equipment backed by integrated OEM-approved service networks and real-time fleet data insights.

We don't just hire machines - we deliver predictable performance through a strategic partnership model built on WIN/WIN outcomes, where keeping production moving and projects on track is a shared goal between our clients and our team. We exist to maximise equipment availability and help our clients move earth productively, predictably and without the headaches of ownership.

OUR VISION

To be the trusted dry hire partner powering earthmoving excellence across Australia, through smart asset management (SAM), responsive service and a commitment to keeping production moving for a brighter future.

OUR MISSION

Volentix delivers application-fit, data-driven dry hire fleet solutions that maximise uptime, reduce risk and empower clients in mining, quarrying and civil sectors to achieve operational success - without the headaches of ownership.

We exist to help our clients operate more productively, predictably, and profitably. Our solutions are designed to reduce downtime, improve cost control, and enable operational excellence.

OUR VALUES

The principles that drive everything we do.

At Volentix, our values are not aspirational words on a wall - they are the standards we hold ourselves to every day, on every site, with every client. They shape how we show up, how we work, and how we grow.

By working **TOGETHER** with **EXCELLENCE** and fostering **CONNECTION**, we achieve **EVOLUTION** - and it is this commitment that drives a true **WIN/WIN** outcome for everyone. These values define what it means to be apart of the Volentix team.

TOGETHER

We are respectful, honest & transparent in our actions. We, succeed by working together.

CONNECTION

We build connections with our colleagues, clients, and business partners.

EXCELLENCE

We are rigorous in protecting excellence. We seek to improve to a high standard. We won't be beaten.

EVOLUTION

We embrace innovation and improvement, so we thrive in the evolving landscape.

OUR SERVICES & ADVANTAGE.

A smarter approach to dry hire - built for production, backed by expertise.

Volentix delivers more than equipment - we deliver a unified fleet solution. Every engagement is supported by integrated service, live data intelligence and a partnership model designed to keep your project moving from day one.

What we deliver

- **Dry Hire Equipment** - Application-fit, low-age earthmoving fleet maintained to OEM standards and ready to perform from day one across mining, quarrying and civil applications.
- **Smart Asset Management (SAM)** - Full lifecycle management from procurement and mobilisation through telematics monitoring, planned maintenance and performance optimisation - eliminating the headaches of ownership.
- **OEM-Certified Service Support** - Integrated maintenance, rapid breakdown response and warranty-protecting servicing through a national OEM-approved service network - keeping equipment productive and projects on schedule.
- **Real-Time Telematics & Data Insights** - Live machine data across utilisation, health and compliance, enabling proactive decisions and greater operational visibility throughout your project lifecycle.
- **Fleet Mobilisation & Logistics** - Fast, coordinated mobilisation for short-term requirements or extended engagements, with full logistics management so your project starts on time and runs without interruption.
- **End-to-End Lifecycle Support** - From first mobilisation to equipment return, Volentix manages scheduling, parts coordination, performance reporting and continuous optimisation.

The Volentix Advantage

✓ **Reliability** - Modern, OEM-serviced equipment ready to work on day one - every time.

✓ **Support** - Responsive local teams and OEM-approved backing ensure minimal downtime and maximum productivity.

✓ **Visibility** - Real-time fleet data empowering informed, proactive decisions throughout your project.

✓ **WIN/WIN Partnership** - Your success is our success - we operate as a true strategic partner, sharing outcomes and building long-term value.

OUR EQUIPMENT.

Our modern, low-age fleet spans the 30-100 tonne class and is configured specifically for demanding mining, quarrying and civil environments. Volentix offers the following equipment solutions:

MACHINE TYPE	APPLICATIONS
Articulated Haulers	Mass haulage, earthmoving, watercart
Dozers	Bulk pushing, ripping, grading
Excavators	Bulk dig, site prep, pit support
Graders	Road formation, grade control
Loaders	Load & carry, stockpile management
Rollers & Compaction	Compaction, pavement prep
Skid Steers	Site cleanup, tight space works

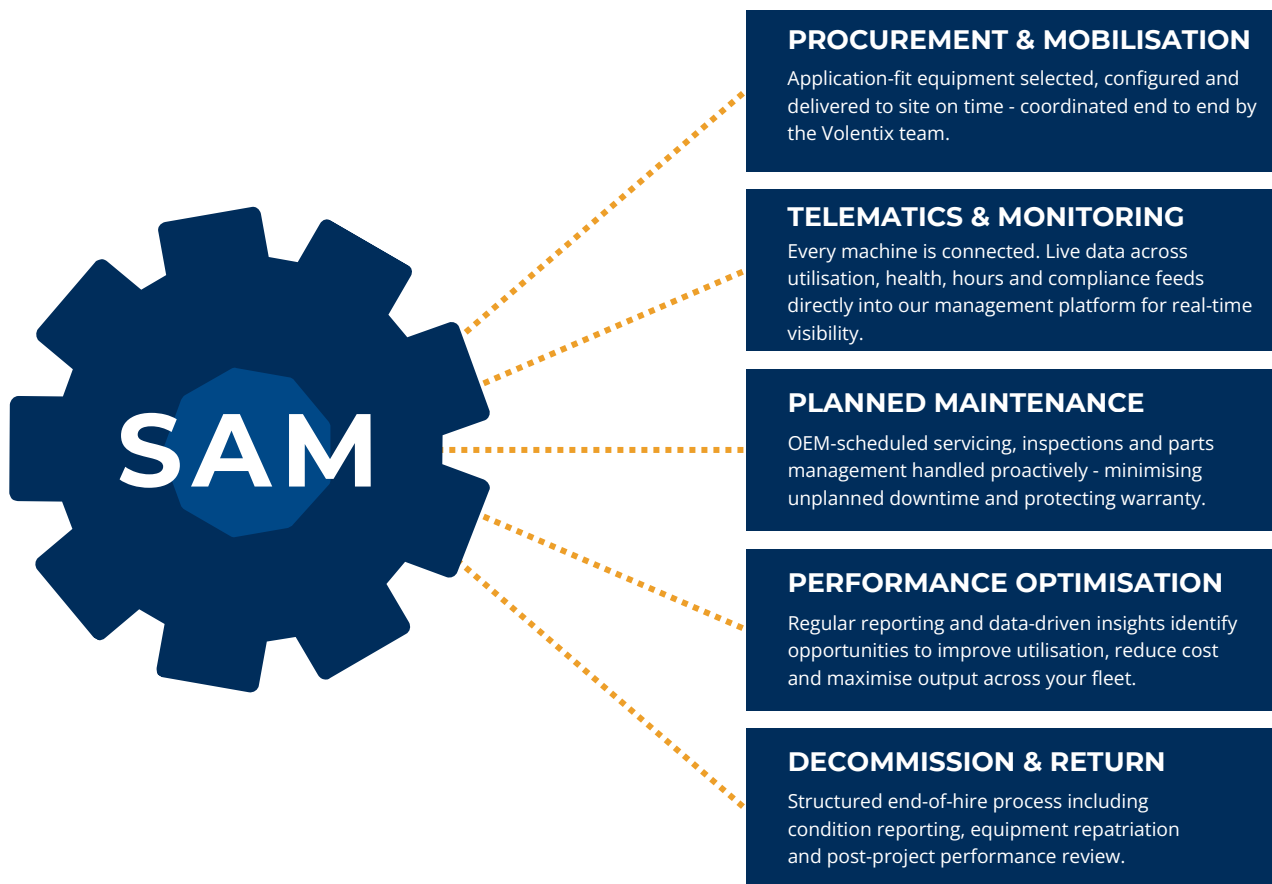

All equipment is maintained to OEM standards, connected via real-time telematics and supported by our service network.

OUR SAM PROGRAM.

Smart Asset Management - built for production.

At Volentix, Smart Asset Management (SAM) is more than a service - it is the operating system behind every machine we put on site. Our SAM program integrates procurement, telematics, maintenance and reporting into a single, seamless solution that removes the complexity of fleet ownership and puts production certainty back in your hands.

Key Benefits

- **Maximum Uptime** - Proactive maintenance and real-time monitoring means issues are identified and resolved before they become production problems.
- **Full Transparency** - Regular performance reports give you complete visibility over fleet utilisation, costs and compliance - no surprises, no guesswork.
- **Zero Ownership Headaches** - From procurement to return, Volentix manages every aspect of your fleet - so your team can focus entirely on production.

We don't just hire machines - we manage their entire lifecycle, so you don't have to.

OUR CLIENTS & PARTNERS.

Volentix partners with mining companies, civil contractors, quarry operators, project managers and procurement managers across Queensland and adjacent regions. Our solutions are designed to scale from single-machine requirements through to full project fleet engagements.

Clients

- Mining companies - large-scale production operations
- Civil contractors - bulk earthworks & infrastructure
- Quarry operators - aggregates & processing
- Project managers - schedule certainty & fleet control
- Procurement managers - cost control & scalable solutions

Industry Partners

- Volvo CE - OEM equipment partner & service network
- SMH Equipment - OEM-approved service and parts partners with established regional logistics & field support networks,

Our background in equipment management under the SMH Equipment brand underpins our operational expertise, systems and service networks - giving Volentix a proven foundation from day one.

Industries we serve

Mining

Reliable, application-fit equipment supporting large-scale production operations in demanding site conditions.

Civil Construction

Project-ready fleet solutions for infrastructure, bulk earthworks and site development.

Quarrying & Aggregates

Consistent equipment performance maintaining output continuity in processing-intensive environments.

Resource & Energy

Equipment solutions engineered for remote, high-demand resource and energy sector projects.

Scan. Connect. Mobilise.
Your project. Our fleet.

**Let's move earth together,
for a brighter future.**

A unified fleet solution.
